There are 41 revealing pages and they're all about you. The REAL you. These pages are even more detailed and reveal more about your personality than the mini-report.

No one person fits into just one category. People have substyles. So instead of just grouping you into one of four different styles - like I have done with the mini-report you just read - the full report shows you **\*\*precisely\*\*** where you fall into one of 16 different styles. I have even plotted it on a graph so you can see what I'm talking about.

Your 41-page in-depth report is ready for you to view right after you take your Platinum Rule assessment.

After you read your personalized report, you'll know exactly how you interact with others on the job. What type of alliances you should attract. How you can get along better with your boss, your friends, and even your family. And that's not the half of it. You'll be able to take advantage of your strengths. At first, you'll be stunned how effortlessly you get along with anybody. Your life noticeably improves in many different areas once you learn to apply **Platinum Rule™**. You won't even believe how much. At first, it almost feels like you're cheating. But I can assure you that you're not. It's just that now you're swimming **with** the current of personal communication, instead of against it.
